

TEAM PROFILE

ALI KHONSARI
CDA II, B.B.A.

IDL VICE PRESIDENT

As general manager, Ali leads the day-to-day operations of IDL. He regularly attends courses at the Las Vegas Institute for Advanced Dental Studies (LVI) and encourages our RDTs and technicians to participate in courses (throughout Canada and the U.S.) because he believes it is vital to keep informed of the latest developments in the dental technology field. He is also a certified level II dental assistant and a cabinet member of Georgian College's new Centre For Health And Wellness.

Ali recently attended the International Dental Show in Cologne, Germany which is held biannually in the city's massive International Expocentre. He observed live demonstrations by renowned dentists from across the globe and discovered some very useful new technologies as well as some interesting emerging ones.

IDL integrates technologies into the laboratory's production process once it demonstrates success and efficacy from extensive in-house research and testing. It is not enough for a particular technology to streamline turnaround, it must ultimately assist in the fabrication of reliable, esthetic restorations.

The Procera CAD/CAM system offers the full range of prosthetics for both natural-tooth and implant-retained restorations. The system represents the next generation for prosthetics in terms of precision of fit,

material homogeneity and mechanical stability. The Procera portfolio is the largest and most versatile of all currently available CAD/CAM systems and provides long-term clinical performance and—most importantly—patient satisfaction.

With his experience and strong grasp of the field to draw from, Ali designs innovative programming with timely topics for IDL's Continuing Education Centre. The next six months are shaping up to be incredibly exciting with a whole new series of courses, lectures, seminars and workshops presented by experts in their field. The Centre offers programs for all dental professionals: doctors, denturists, hygienists, treatment coordinators and auxiliary team members.

Ali's passion for improving the Simcoe community is evident through his participation in local fundraising campaigns. He also enjoys organizing special events like IDL's annual Blue Jays Day held every summer at the Rogers Centre. This great family outing is coming up soon—stay tuned for the details.

Ali's primary focus is to ensure that every office receives the best care and service possible. Whether you would like to learn more about IDL's extensive products and services or unique programming, Ali would enjoy hearing from you. Call IDL today: 1.800.461.7559
