HELPING TO MAKE YOUR PRACTICE MORE PRODUCTIVE

PROSTHODONTIC REVIEW 2012

The current best evidence regarding specific aspects of prosthodontic care will be synthesized and discussed.

Barrie Prosthodontics is a multidisciplinary specialty practice, providing conventional and implant prosthodontic care. It was started 30 years ago by Dr. Lawrence St. Pierre and continues to thrive today under the leadership of Drs. John P. Zarb, Lawrence St. Pierre, David Chvartzaid and Tonino Ciocca. Our team of prosthodontists, periodontist and clinical and administrative staff, is committed to providing excellent specialty care for patients in our community. Our new state of the art facility has enhanced our ability to provide implant, aesthetic and reconstructive dental care using cutting edge technology in a serene and comfortable environment.

This day is dedicated to celebrating both this significant anniversary and the inauguration of an annual event in the continuing education calendar. This all day lecture is also part of Barrie Prosthodontics' celebration of the 2012 National Prosthodontic Awareness Week.

COURSE OBJECTIVES:

- 1) To provide a conceptual framework for making the best clinical decisions.
- 2) To review the current best evidence available regarding specific aspects of conventional and implant prosthodontic care.
- 3) To discuss everyday clinical challenges associated with prosthodontic care.
